What Is A Game ?

A game is a structured form of play, usually undertaken for entertainment or fun, and sometimes used as an educational tool.

How Games Are Made ?

What Is A Game Engine ?

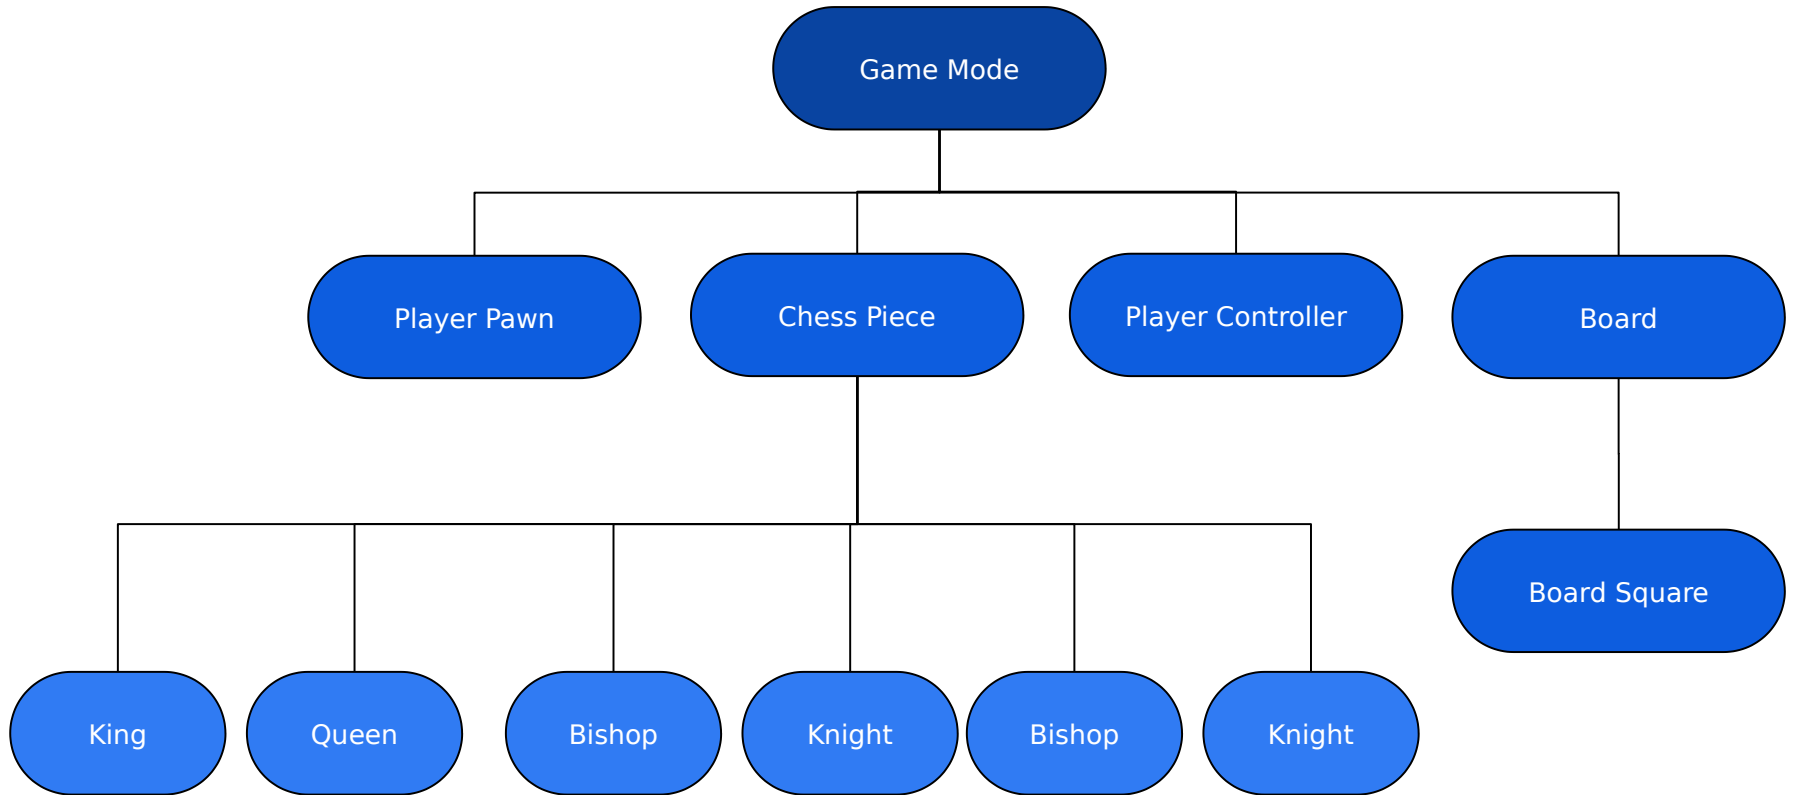

A game engine, also known as a game framework, is a software-development environment designed for people to build video games.

Why Unreal Engine ?

Unreal Engine is a complete suite of development tools for anyone working with real-time technology. From design visualizations and cinematic experiences to high-quality games across PC, console, mobile, VR, and AR, Unreal Engine gives you everything you need to start, ship, grow, and stand out from the crowd.

Pipeline Of The Game

Conclusion

- It will provide the users very new and interactive graphical user interface.
- It will help the users to enhance their strategic and logical thinking.
- Users will get a very new environment like (different chess board, different characters etc).
- This project will change the mindset of users regarding the chess video game.
- While playing the game users will get entertained by seeing the different animations of the characters.

Thank You
